Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 11-14, 26-29 are drawn to an encode/decode digital source materials including a payment system, classified in class 705, subclass 77.
- III. Claims 61-74 are drawn to a music database that can receive/transfer ambient music via a cell phone.
- II. Claims 15-60, 75-76 are drawn to an encoder/decoder a digital object including a watermark, classified in class 713, subclass 176.
- IV. Claim 77-89, drawn to portable communication devices including sound waves, extraction of hidden data, classified in class 455, subclass 11.1.

Inventions I -IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an electronic banking system which would not require watermarking, or a portable communication device, authentication or licensing to complete the transaction over the internet. Invention II has separate utility such as authentication for printed material that would not require a portable communication device to transport the printed material. Invention III has separate utility such as licensing of literature that does not require a watermark, or portable communication devices, or authentication. Finally invention IV has separate utility such as portable telephone apparatus that

Art Unit: 2135

does not require watermarking or electronic banking system or licensing for the basic functionality of the apparatus. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
